

## Rental Software in the Cloud

[www.hirehop.com](http://www.hirehop.com)

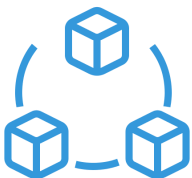

HireHop was built to give the hire and rental industry an affordable and modern cloud software solution. Built by people who have worked in the hire and rental industry, as well as our users who have told us what they need and want. This has enabled the team to create the most powerful, intuitive and versatile equipment rental software in the world.

### **Create**

Hire, Sales and Labour inventories. Produce jobs, projects as well as interactive and customisable documents, including quotes, purchase orders, invoices, PAT test certificates, PAL labels and statements.

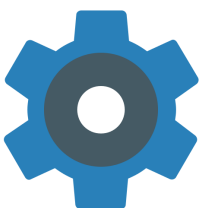

### **Management**

Email documents from your own email address using [HireHop](#), viewing and storing them in jobs. Perform stock checks, log PAT Tests, LOLER tests and services. Manage labour with the resource planner. Utilise powerful barcode scanning features. Build packages and pre-prepped kits.

### **Collaborate**

Multi-depot, multi-user and multilingual. Synchronise with accounting software and other cloud apps. Assign job and project managers and set tasks for other users.

### **Customise**

Change any word or phrase, manage user permissions, change the look and feel and, to top it all off, with the API you can interface and completely customise your [HireHop](#).

## Rental Equipment Software Built Around You

We built HireHop to give the rental industry an affordable, modern and powerful equipment rental software solution. It has been built by people who have worked in the hire and rental industry, along with invaluable suggestions and feedback from our users, people like you, who have told us what they need and what they want.

This experience and feedback has enabled us to deliver software perfectly tailored for rental companies like yours, giving you the most intuitive, powerful, versatile

## Cloud Rental Management Software

HireHop is true cloud based rental equipment software that is feature rich, easy to use, portable, customizable and flexible to your needs. Being in the cloud means that HireHop works on any operating system with an internet browser, whether it be on a computer, tablet or phone.

## Rental Business Inventory Software

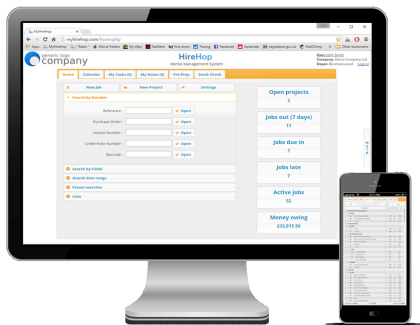

HireHop introduces new and important features never seen before in rental business inventory software, from asset management features like simple pre-prep, email integration and stock checks, to new administration features like job calendars and full email integration. With its unparalleled speed, it not only performs well, but its familiar interface makes it easy and intuitive to use.
